SPRING BRAKE CHAMBERS

TRP® Spring Brake Chambers feature an 8-gauge service housing, OE main power spring as well as OE return springs. The bottom of the service housing contours to complement the 8-gauge steel for added strength. The double O-ring design prevents air leakage between the parking chamber and service chamber, making TRP® Spring Brake Chambers robust and reliable.

CAST BRAKE DRUMS

Part #
DB1657B

HUB PILOTED DRUMS

The slightly larger-sized bolt hole does not affect the fit, form or function of the brake drum and only serves as a clearance hole for the wheel stud.

The brake drum is centered onto the hub using the 8.78" machined pilot and the bolt holes do not serve as a piloting function.

REMAN BRAKES

The TRP® brake program exemplifies consistency in product quality, performance and value. TRP® Reman Brake Shoes go through an extensive cleaning and shot blasting preparation to guarantee excellent adhesion of the paint coating.

Premium Friction

TRP® premium-grade friction material is engineered to handle high braking duty cycles encountered in city pickup and delivery applications. Premium friction provides excellent lining life, superb stopping power, minimal drum wear and superior resistance to fade.

Standard Friction

TRP® standard-grade friction material provides dependable stopping power, good fade characteristics, quiet operation and good lining life. Standard friction is ideally suited for on-highway, dry freight, inter-modal leasing and straight truck applications.

Line Haul Friction

TRP® line haul friction is uniquely formulated to provide consistent braking performance and reliable lining life. Line haul friction is best suited for on-highway tractor and trailer applications.

NEW BRAKE SHOES

The TRP® heavy duty brake program exemplifies consistency in product quality, performance and value expected from TRP®. All products offered in the TRP® program meet or exceed FMVSS 121 standards at a competitive cost. Critical to the remanufacturing process is the treatment of the shoe itself before painting. All shoes go through an extensive cleaning and shot blasting preparation to guarantee excellent adhesion of the paint coating.

TRAILER CAMSHAFTS & BUSHING KITS

TRAILER CAMSHAFTS & BUSHING KITS

As the foundation of the air brake system, the brake camshaft must meet the increasing demands of today's harder working brakes. TRP® Camshafts utilize computer numerically controlled (CNC) turret lathes and computer controlled heat-treating equipment to ensure reliable performance.
