

Brake Safety Week set for Sept.16-22

Truck Maintenance Tips from
the Peterbilt Service Managers

Will your truck be ready for inspection during **Brake Safety Week**?

Will your truck stop smoothly, if the vehicle in front of you stops suddenly?

The **Commercial Vehicle Safety Alliance** has scheduled its annual week-long Brake Safety Week inspection blitz during the third week of September this year.

During last year's truck inspection marathon, **14% of truck drivers** were placed out-of-service because of brake-related violations! Brake problems are also on the top of the list during CVSA's annual spring Operation Roadcheck.

Our 5 **Midwest Peterbilt Group** service centers are offering a special to get your truck ready for Brake Safety Week: **\$25 OFF a Brake System Inspection** – expires Sept. 30, 2018.

Plus, our **Peterbilt Parts Departments** are also offering money-saving special offers on a variety of brake parts, including shoes, pads and drums.
