Top aids for winter driving

Don't wait for the snow to fly before you get your truck ready for winter driving. In addition to getting your oil changed and anti-freeze checked, our **Peterbilt Service Managers** recommend these products to help you drive safer during the frigid months ahead:

WINTER FRONTS

A winter front lets air in, but keeps the ice and snow out. This cover protects the radiator, air to air aftercooler and AC condenser from ice and road debris. It also helps today's cooler-running diesel engines run warmer and more efficiently during cold weather.

Our TRP brand **Winter Fronts** are designed to fit all recent Peterbilt models, both traditional long-hood and the new aerodynamics. They are constructed from heavy-duty, reinforced vinyl. The snaps utilizes the same pattern as **TRP Bug Screens**.

Be sure to choose TRP winter fronts **certified** to work well with your emissions-control system; other styles and brands can cause **faults!**

A winter front lets air in, but keeps snow and debris out. Choose certified TRP winter fronts designed to work well with your truck's emissions-control system.

Our Peterbilt Parts Stores have winter fronts available for most heavy trucks makes and in three colors: white, black and yellow for school buses. We also carry mounting/install kits and replacement snaps and turnbuckles for repairs.

while resisting rust, chemicals and summer heat. The all-steel bridge is more durable and comes with universal mounting adapters. **Winter Blades**, with a protective boot to lockout snow and ice, are a better choice for driving up North.

WINDSHIELD VISIBILITY

Getting ready for winter includes making sure you will be able to see clearly through your windshield in foul weather. Your windshield wipers will work better with new blades and a full tank of cleaning solution.

The TRP molded premium rubber **Windshield Blade** offers a better wipe,

WINDSHIELD WASH

Make sure your truck's reservoir is filled with **TRP Windshield Wash Solution**. This natural eco-friendly cleaning agent removes dirt, bugs and tree sap with freeze protection down to **-30°F**. The solution also contains an additive that repels and beads rain, improving vision.

Visit our Peterbilt locations for the advice, products and service needed to keep your truck rolling down the cold roads of winter.
